Vaccination explanations

Supavax - this does anthrax, botulism and Blackquarter

Use in spring – Sept/Oct

Covexin 10 - this does 10 strains of clostridiums (Redgut, pulpy kidney, Blackquarter, tetanus, septicum and others.

Can be used at anytime but better with the change of seasons

Multivax P - does 4 strains of clostridium (pulpy, tetanus, Blackquarter, malignant odema) and pasturella.

Multivax P Plus - this contains 7 in 1 clostridiums and Pasturella

These combination vaccinations save time and handling and you cover all these diseases with one vaccination. To do these separately would mean a wait of wait 2-3 weeks between vaccinations.

PRICES MAY VARY WHEN NEW STOCK IS ORDERED
